

CLASSROOM ON WHEELS

Moving Beyond PC Labs

Current COW Model in Pakistan

The COW Cart has robust Laptops by Intel for extreme Environments. Each Student has their own Individual Laptop

The COW Cart has its own Wireless Internet Access and a WiFi Network

The COW Cart allows the student Laptops to view what is being presented by the Teacher

The COW has a Laptop for Teacher

The COW Cart has builtin UPS system having backup of 6 hours and the capability to charge all student Laptops

Our Belief:

Viper Technology believe that education is the fuel that drives economic growth and social progress. Effective teaching is the key to successful, collaborative and personalized learning—which in turn creates better prepared students, more prosperous nations, more secure societies, and more engaged global citizens.

Classroom on wheels (COWs), are a versatile, cost-effective way to bring mobility to students and teachers without the high cost of one-to-one programs or even traditional computer labs.

WHAT IS CoW ?

Computers on wheels (COWs), are a versatile, cost-effective way to bring mobility to students and teachers without the high cost of one-to-one programs or even traditional computer labs. By bundling several laptops on a mobile cart, teachers can bring the technology to the students, helping to minimize costs and make the most of tight budgets.

This model is fitted with wheels, and allows for easy movement of a full PC setup. Perfect if you need to have a PC in more than one location.

Great for Schools, hospitals, doctor ,offices & conference rooms.

CLASSROOM E-LEARNING INGREDIENTS

Brings technology into the classroom for part of the school day

- Computers on wheels

(COWs): Mobile carts with student laptops

- Teacher laptop

- Internet access

- Teacher professional development

- Digital content

- New curriculum and learning methods

The Winning Deployments:

The task is tough , the path is difficult but with our team's efforts and dedication, Viper have closed 400 CoWs and closing.....

Jointly with NGOs like Edlink, British Aid, USAID and some local in FATA, interior Sindh (flood effected areas) and Baluchistan

Government Schools

(KPK and Punjab)

Private Schools

(like Beaconhouse, HeadStart KGS and others)

75% of the total deployments was in Government Schools , flood effected areas, Baluchistan and FATA as we started to bring the change from bottom. We feel honor to give privilege to unprivileged. Viper always oppose the discrimination in education and we proved with our efforts.

Training Provided:

Computers are increasingly being used in classrooms and schools in order to increase the learning outcomes of students. An integrated approach towards incorporating the use of computer technology during the teaching process can help students benefit from the enormous gains being made in the field of learning technologies. Viper technology have trained more than 4000 teachers all over Pakistan.

Our Purpose of Training:

- Training teachers to operate and maintain computers in their schools
- planning and preparing lessons and setting learning objectives.
- Training teachers to effectively use computers effectively in order to improve children's understanding of Math, English and Science subjects.
- Training teachers in trouble shooting skills
- Design activities that encourage "active" learning in which students are expected to participate.

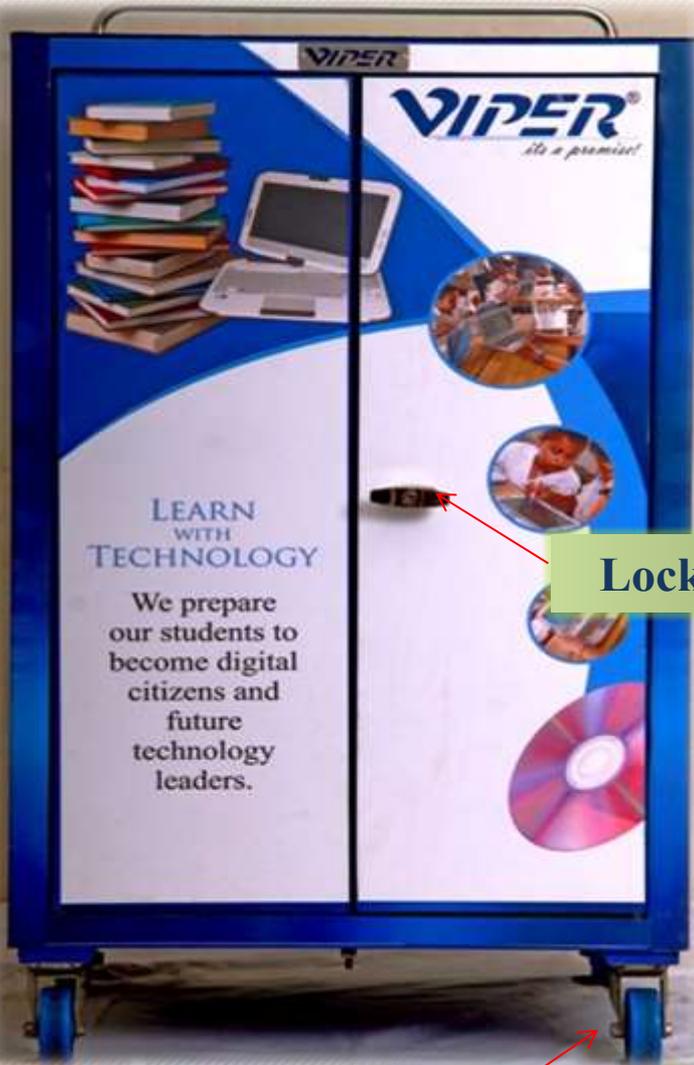

Fitted Chargers inside the cart

Built in UPS
(Charging the machines in the absence of Power and powering Wi-Fi on the move)
