Local Support  
Nationwide

1 Years  
Warranty

Designed for performance, reliability, and scalability, the Viper Pacer M tower desktop delivers professional grade computing for modern workplaces. Built with a robust and tool-less chassis design, it allows effortless expansion and easy maintenance while ensuring consistent performance for demanding environments.

The Viper Pacer M is available with both Intel<sup>®</sup> Core™ (14th Gen) processors and Intel<sup>®</sup> Core™ Ultra processors, allowing organizations to choose the configuration that best fits their performance and AI computing requirements.

Engineered for flexibility, the system supports a wide range of memory and storage configurations, including multiple RAM options and various SSD and HDD combinations. Additional storage drives can also be installed to expand capacity as business needs grow.

Reliable and durable, the Viper Pacer M is designed to handle rigorous professional workloads while providing strong manageability and security features for efficient fleet management across organizations.
